## Evening Brief

Date: Tuesday August 7<sup>th</sup>, 2018

---

### Weather Summary

Temperatures will climb each day across the area through Friday, with temperatures on average 5 to 10 degrees above normal. Conditions will be hot, dry and unstable across the entire area each afternoon through Friday. Very isolated showers and thunderstorms will develop Wednesday and Thursday afternoons across far southern Nevada and the Arizona strip.

A dry cold front will move through the northern part of the Great Basin Saturday resulting in gusty winds across northern Nevada, Utah, and Idaho. As the cold front moves from northwest to southeast winds will become more west/northwesterly.

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light Initial Attack Activity
National	5	New Fires and Acres: 15 fires 544.3 acres; 3,001 acres large fire growth

---

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

**Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)**

### Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been issued for North/West Nevada into Idaho and Northwest Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

ERC's are mainly in the 80th - 97th percentile across Northern parts of NV, northern half of UT and ID, where many areas are near or just below record highs for the time of year. Wyoming ERC's are also steadily rising above the 70th - 90th percentiles. Sagebrush Live Fuel Moisture levels across most areas are near early August normals, and grasses are cured in all areas, except the highest elevations above 7000 ft in Idaho and Western Wyoming.

ERC's are still near or below the 50th percentile across the southern third of Nevada, Utah, into the AZ Strip, but even there, drier pockets are beginning to emerge, along with an occasional lightning holdover.

Much hotter and drier weather will move across the entire Great Basin this week with ERCs rising steadily in all areas. Even areas in UT, southern NV and the AZ Strip that have been wet will see some significant drying this week increasing the potential for holdovers region-wide.

## Resources:

### Aviation within the Great Basin

- 1 VLAT's, 4 LATs, 2 CL-415
- 20 SEATs, 2 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 8 Type 2 Helicopters / 8 Committed
- 22 Type 3 Helicopters

### Crews Committed within the Great Basin

- 12 IHCs Committed / 0 Available
- 28 T-2 IAs Committed / 0 Available
